

RAJJECTORY

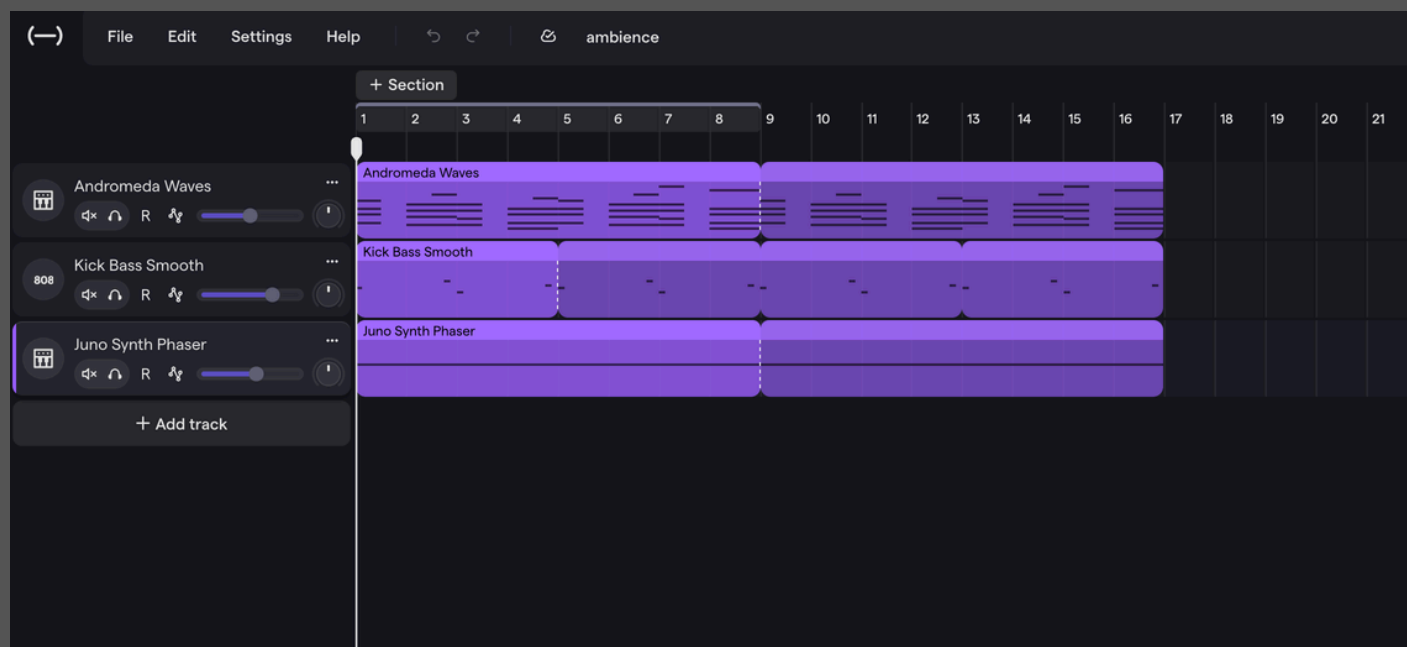

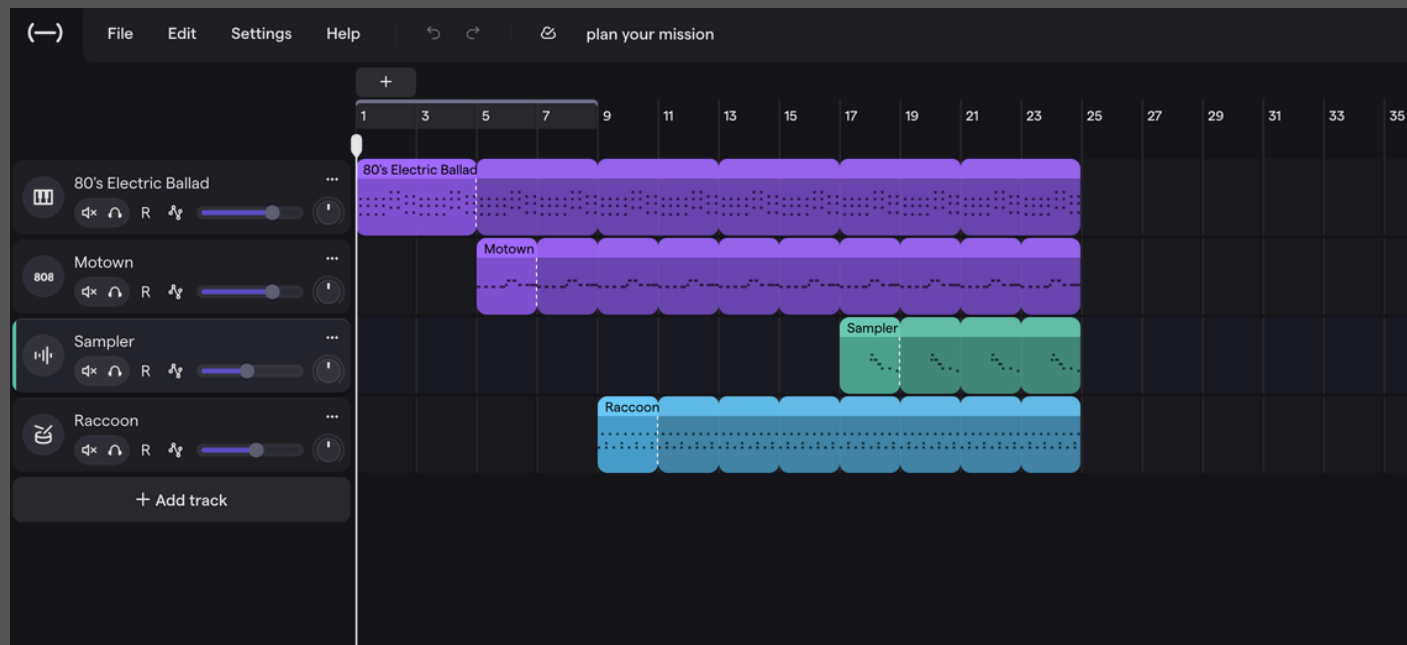

By KNAK - Keshav, Nishant,
Adhyaay, & Kapil

April 2026

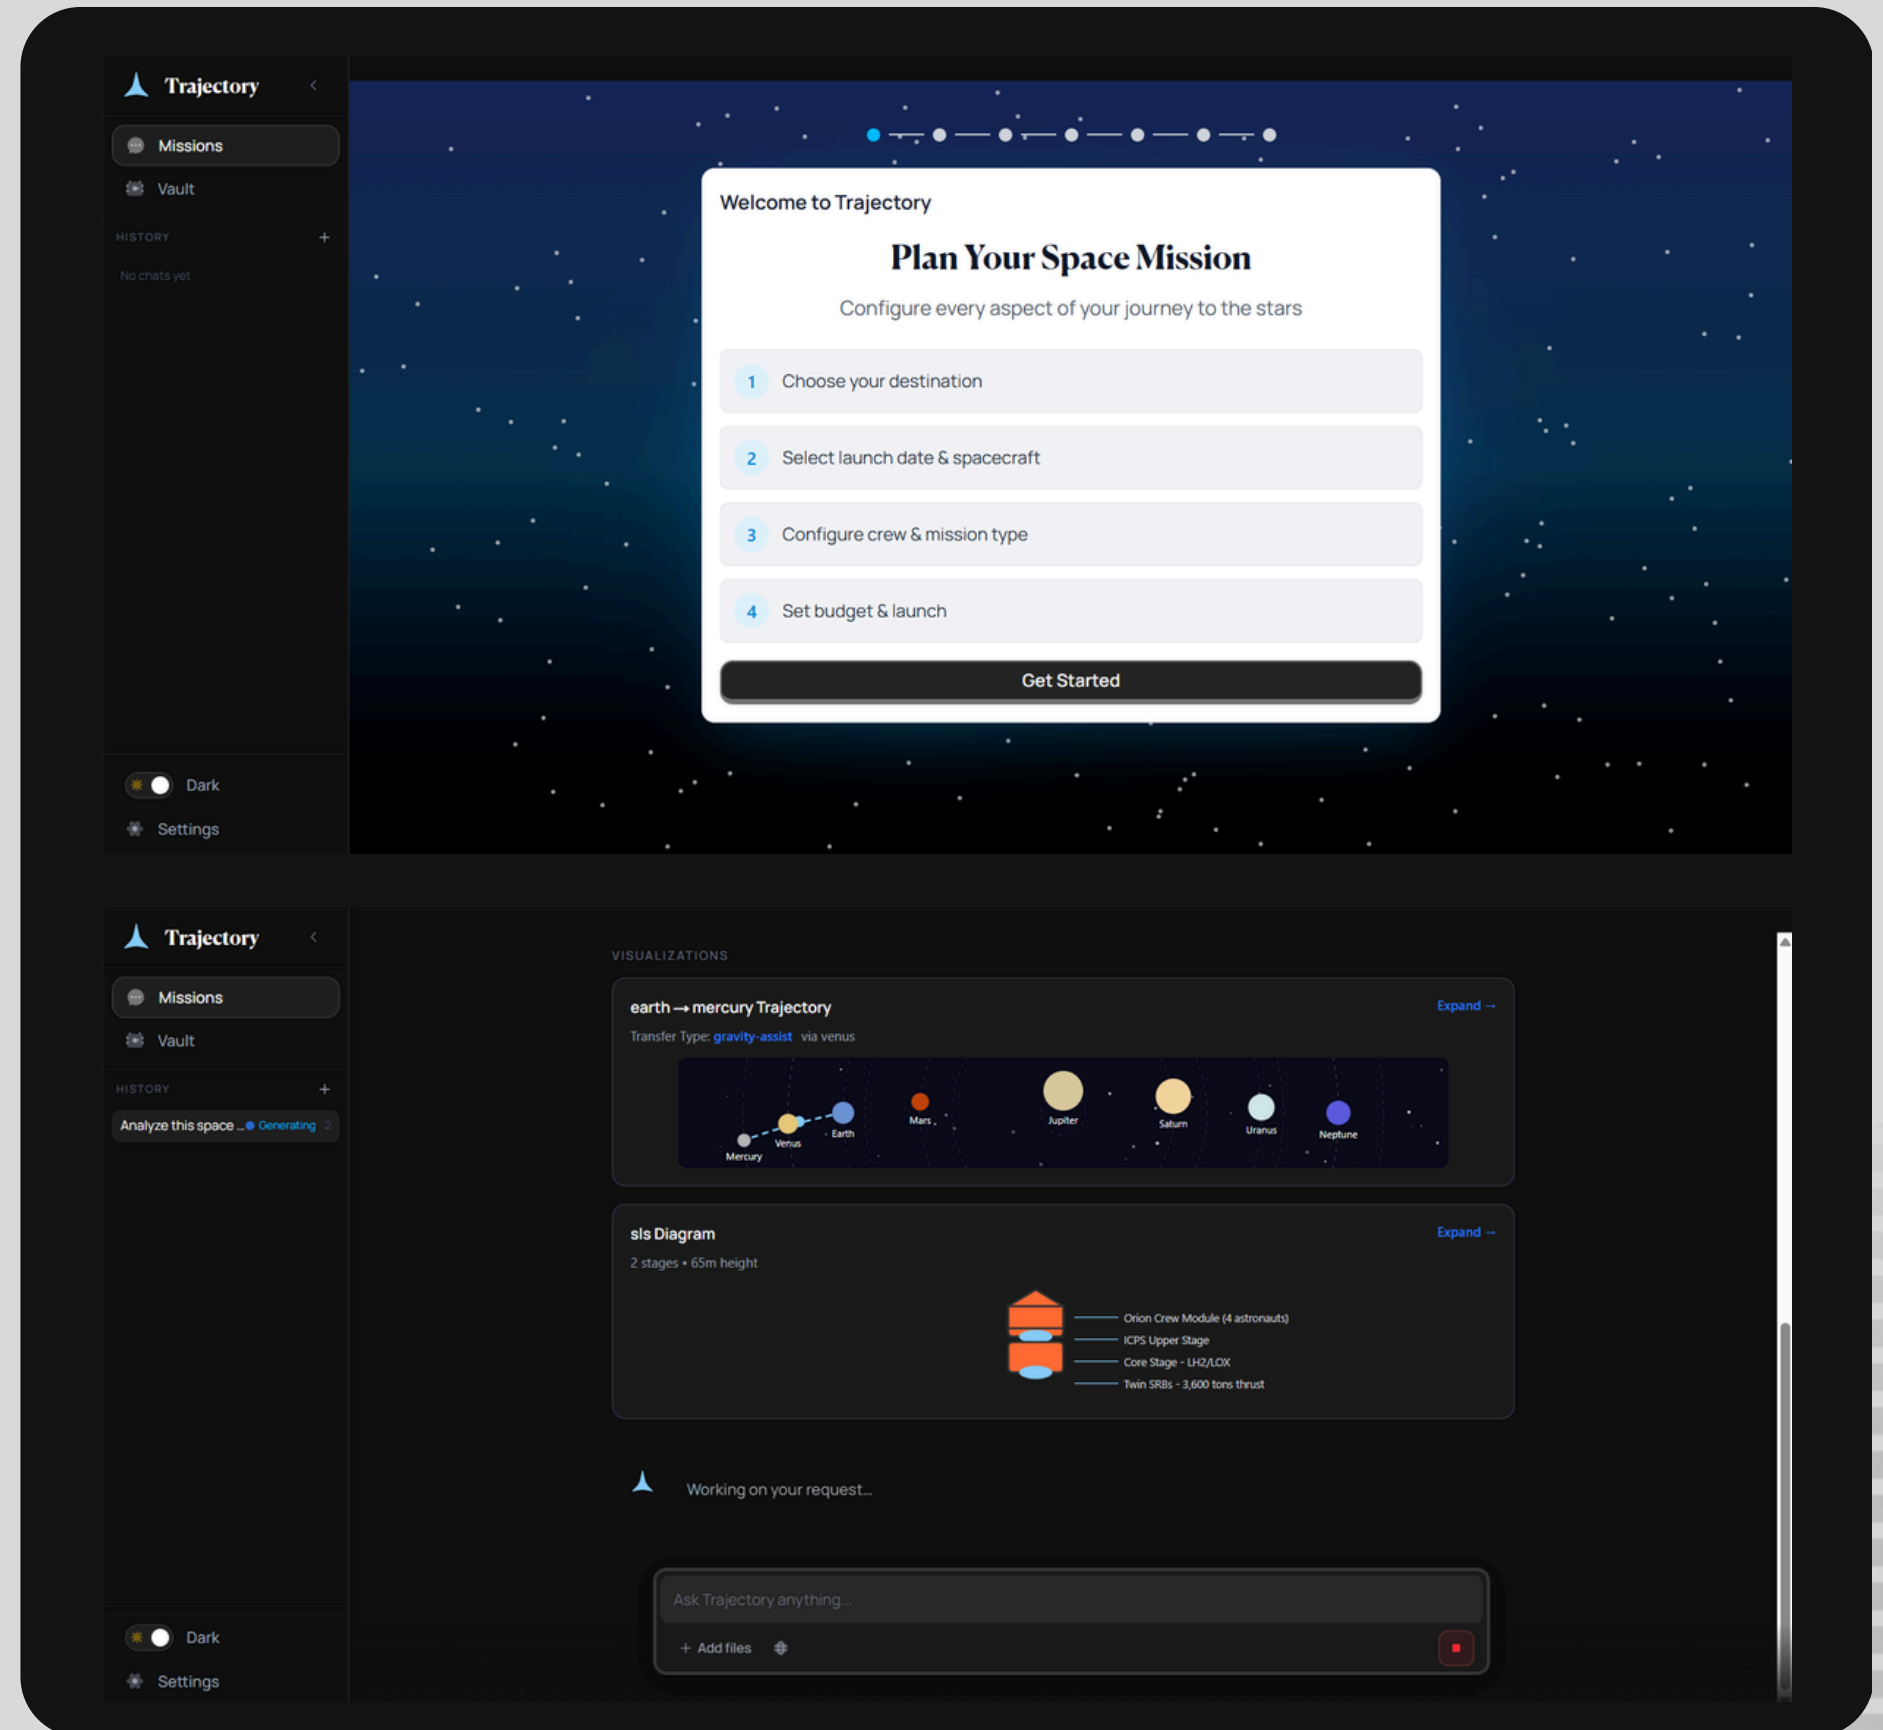

Sound Design

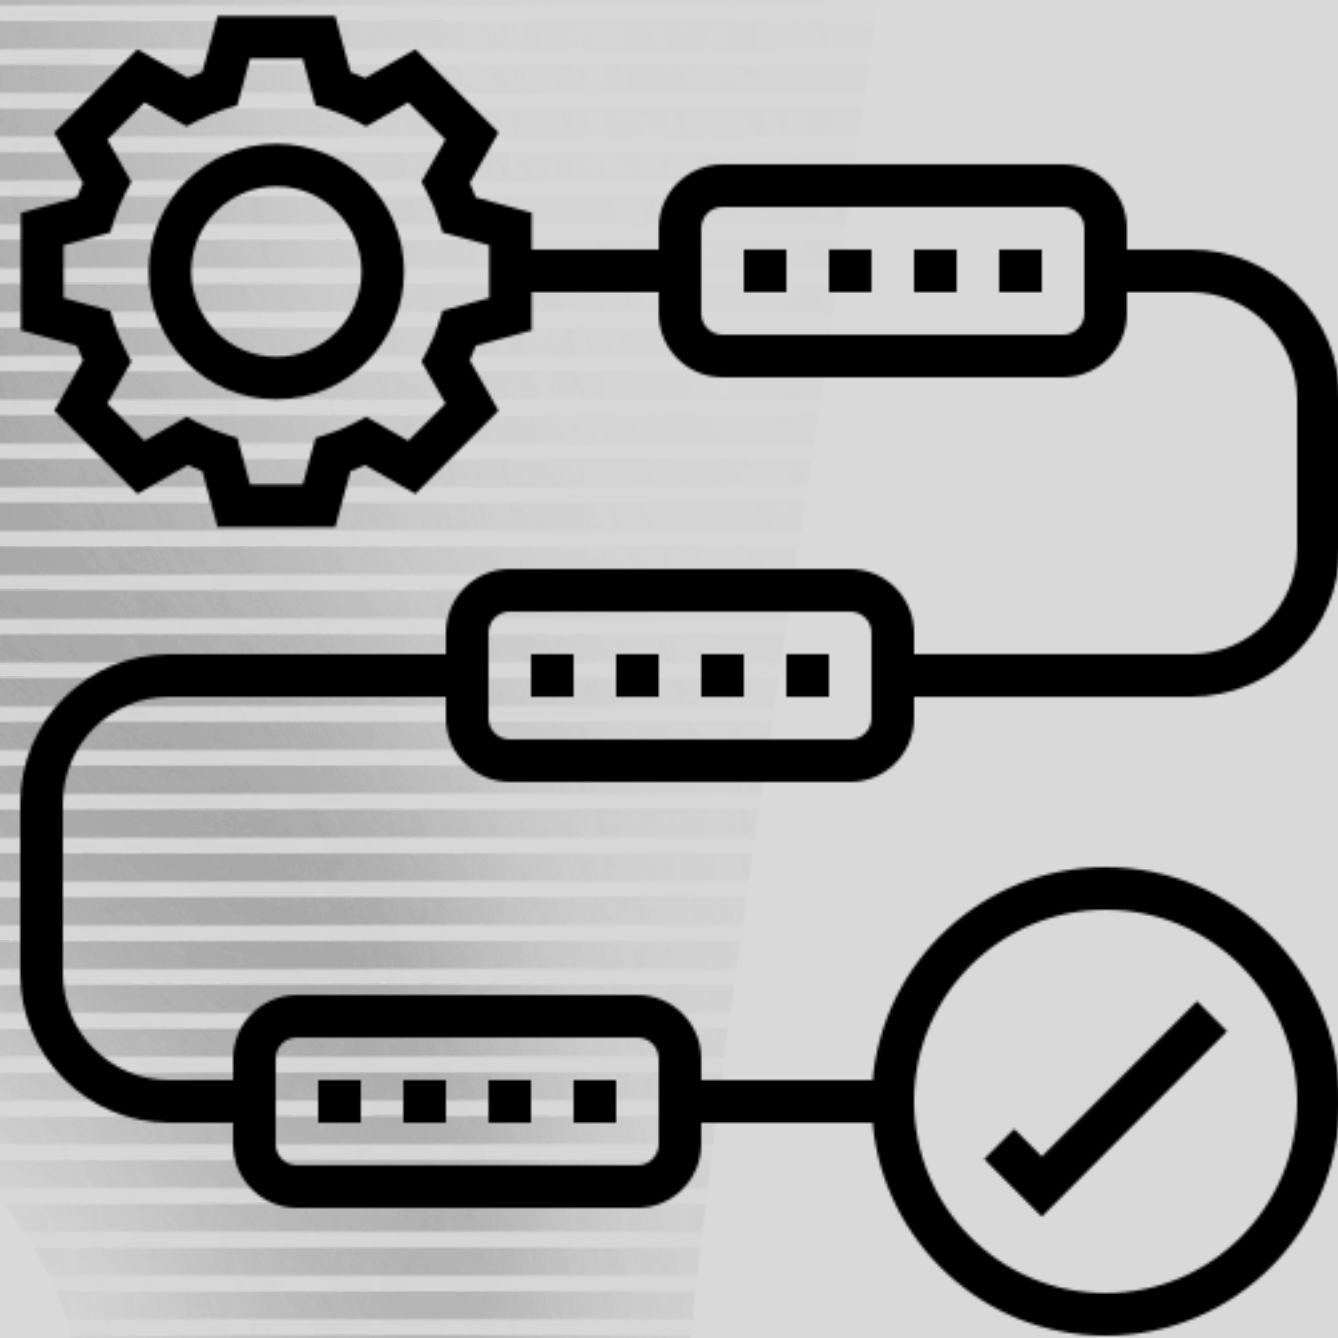

- Focused on smooth UX + clarity
- Used Soundtrap for background music

Chatbot

- AI-assisted reasoning layer
- Prompt + structured input system
- Constraint validation engine:
 - NASA API
 - planetary & mission conditions
- Dynamic explanation generation

Challenges

- AI integration:
 - Fixed with better prompts + cleaner inputs
- Teamwork:
 - Split work (frontend, AI, data)
 - Integration caused bugs
 - Needed strong communication
- 3D models + animations:
 - Hard to find + optimize
 - Many didn't load or slowed app
- Time constraint:
 - Dropped good ideas

Conclusion

Combines CS + space
science

Makes mission
planning interactive +
accessible

Applies real-world
constraints

Strong connection to
scientific theme

Thank you!
